We can dream it so we can do it

CEST Makine

Company Presentation Brochure

About Us

Engineering and project planning, production and after sales service are our main fields of business. Consulting services, regular and periodic planned machine maintenance, failure analysis and reporting are provided to all our customers.

Our strong team offers planning, design, equipment provisioning and spare parts assembly for the whole bottling and filling industry. In machine automation, overhauling single machines or whole production lines we are always one step ahead of our competitors. With this vision in mind our company CEST Makine uses its teams over 15 years expert knowledge to maximize the customer satisfaction.

We offer:

- Improved design and implementation by communicating the customers needs to all parties involved in the design, supply chain, production, delivery and maintenance process.

- Our customers highest quality at affordable prices, at the right time and in the needed form.

- Solid after sales service and maintenance to ensure our products are working free of failure and with the least possible to even no downtime.

- Working close together with our suppliers, monitoring the results and improving the supply chain stages prove how high we value our customers' needs.
